Composite Average	810	01	743

Lumber markets saw muted activity this week as we roll through the dog days of summer. Southern markets saw slow takeaway with the heat curbing jobsite hours, and SYP dimension eased in price in most widths. Dry DF continued it's climb as supply continues to hold markets up. Western plywood ticked up this week while southern saw no price changes, and OSB remained flat in all regions. Fires in the western U.S. have buyers watching closely - any further disruption in supply will bounce markets yet again. Can you believe there's actually an NFL preseason game on this week? It won't be long until the smoke clears, the air is crisp, and football is in full swing.
